## Fuller's India Pale Ale, London, England

B200

First brewed in England and exported for the British troops in India during the late 1700s. To withstand the voyage, IPA's were basically tweaked Pale Ales that were, in comparison, much more malty, boasted a higher alcohol content and were well-hopped, as hops are a natural preservative. Historians believe that an IPA was then watered down for the troops, while officers and the elite would savor the beer at full strength.

## Greene King IPA, Bury St Edmunds, Suffolk, England.

B210

Lots of people say they like this fine ale because it's well balanced with a refreshing, hoppy flavour and a clean, bitter finish. Greene King creates the hoppy aroma and flavour using two varieties of English hop – Challenger and First Gold. The brewers adds the hops to the copper by hand, just as they have always done, and by blending in pale, crystal and black malts they balance the hops with the richness of the malts. The refreshing flavour of Greene King IPA makes it a great accompaniment to spicier foods and curries (though it's always nice simply enjoyed with friends...).

## Murphy's Irish Stout, Cork, Ireland.

(500 ml) can

B180

The lightest and sweetest of Ireland's Big Three (Guinness, Beamish and Murphy's), Murphy's Irish Stout is the "nice guy" of the group. But don't be deceived — that just means you can drink more of 'em. Think chocolate milk topped with a double shot of espresso and finished with a one-inch thick head of caramel-infused creamy goodness. Since the company's acquisition by Heineken in 1983, Murphy's has been enjoying a reputation as one of the fastest growing stout brands in the world. Have a Guinness for dinner, but save this one for dessert.
